

Natural Stone Fireplaces

Created by nature, finished by craftsmen

www.artistsinstone.co.uk

Welcome

Artists in Stone have been producing handcrafted fire surrounds at its Sussex premises for over 20 years.

Our highly-skilled and experienced team combine both traditional and modern techniques to produce stone mantles of the highest quality and craftsmanship.

We only select the finest limestones direct from our sources across Europe and beyond.

For example, Portuguese limestone is a beautiful sedimentary rock with its neutral colour, variation in shading and feathered markings. This makes it an ideal choice for any fireplace, creating a stunning focal point. All the designs in this brochure can be produced in either Portuguese or Turkish Antalya Agean limestone.

Made-to-measure

Every fireplace is made to order at Artists in Stone allowing us to alter and size-adjust any of our standard designs to fit your space and requirements perfectly.

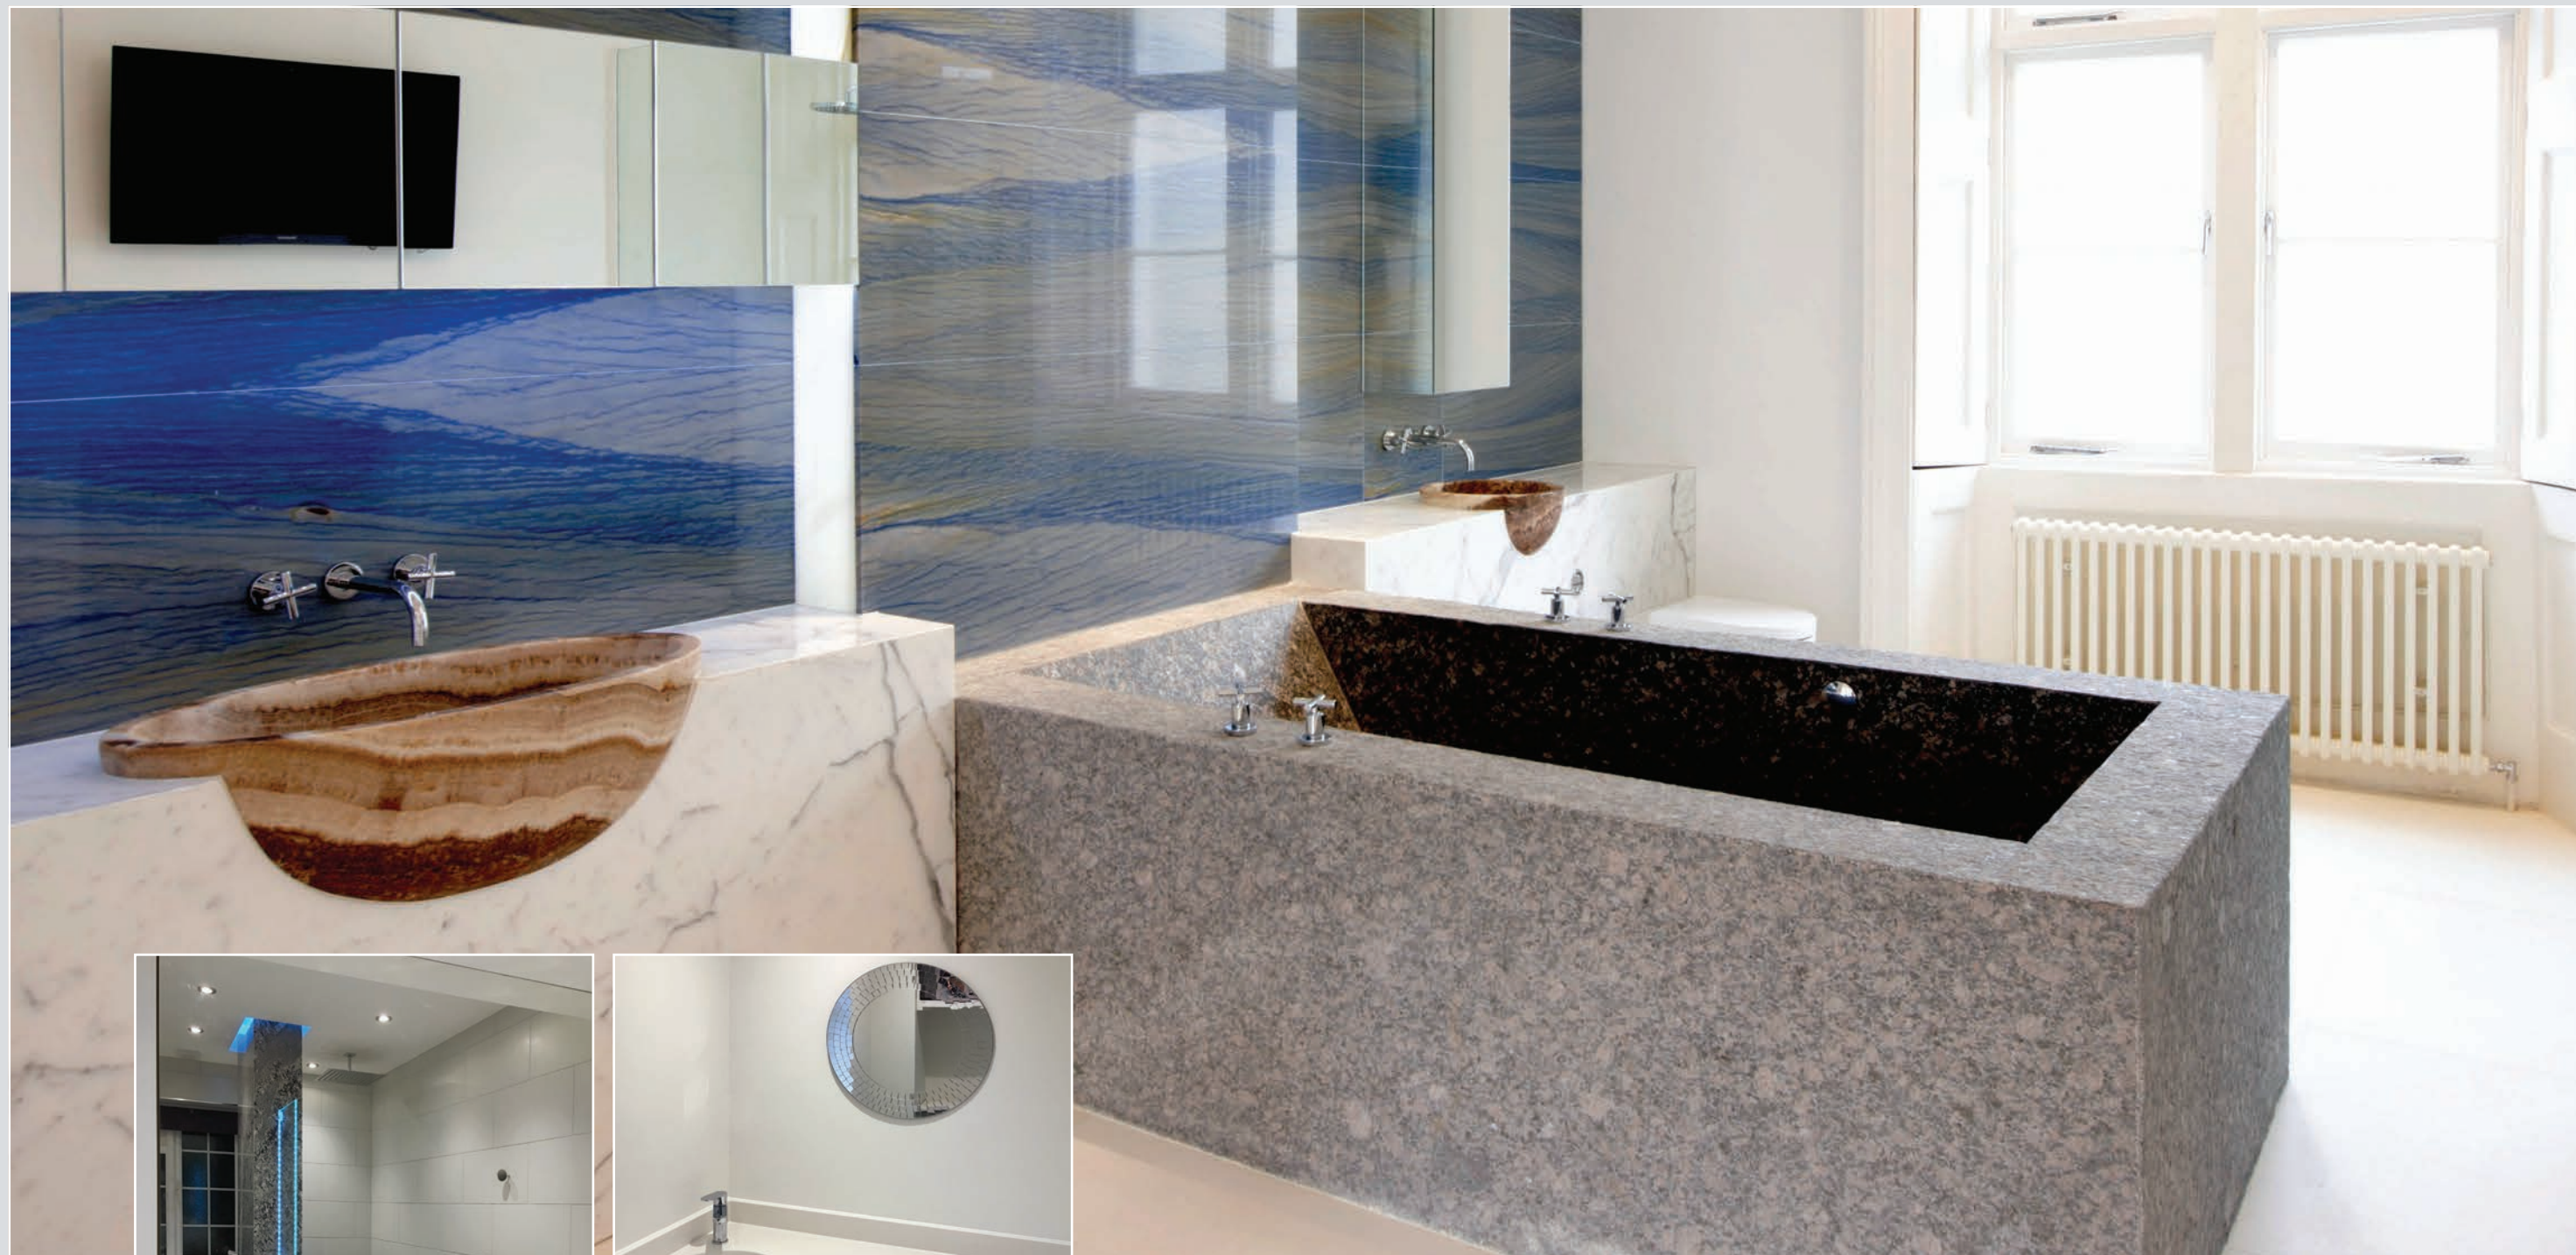

We are also able to produce a totally bespoke fire surround tailored to your design ideas and specifications to create a centre piece that is both unique and personal to you.

Kitchen & Bathroom

Granite . Quartzite . Quartz . Marble

Kitchen & bathroom

Artists in Stone also provides a complete service for kitchen and bathroom surfaces – from template and fabrication to installation in a wide range of stones, colours and finishes sourced from the best quarries around the world.

Natural materials

The limestone used to handcraft this product is a natural material and will be subject to variations and random fossil formation. This is regarded as a feature of the material and not a defect. This product is sealed prior to installation in an attempt to repel everyday stains that may occur. However, like most natural products, limestone is not impermeable and every caution should be taken in caring for your fire surround.
